Financial and banking analysis

2022-2025 history · H1 2026 update · 2026-2028 scenarios

Case study by Ricardo Serodio | Information available on 28 September 2026

H1 2026	ROE	NPE	SOURCE COVERAGE
EUR 565.8m	14.6%	2.2%	182 / 182
Net income	Reported ratio	Reported ratio	176 reported + 6 calculated

Executive view

Group net income reached EUR 565.8 million in H1 2026, up 12.7% year on year. Operating income rose 5.5% and operating costs 5.4%, keeping cost-to-income close to 37%. Lower other impairments and provisions supported earnings growth, while credit impairment charges increased.

Credit quality improved: NPE fell from 2.7% to 2.2% and coverage increased from 84.5% to 97.2%. Fully implemented CET1 was 15.1%, retaining the source qualification as an estimate including 10% of unaudited interim earnings.

The project connects official sources, CSV data, Python calculations, SQL queries and Power BI. Scenarios are educational assumptions: their arithmetic is checked, but they are not bank forecasts.

Update source: results release dated 29 July 2026, PDF pages 2, 3 and 9. The appendix provides all 182 observations, page references, sources and qualifications.

01 / Annual history

EUR million. Full-year Group figures; net customer loans. 2023 comparatives follow the FY2024 release and 2024 comparatives follow the FY2025 release.

Metric	2022A	2023A	2024A	2025A
Net interest income	2,149.8	2,825.7	2,830.9	2,898.1
Fees and commissions	771.9	771.7	812.7	847.4
Operating income	2,867.5	3,769.7	3,573.5	3,815.2
Operating costs	1,073.0	1,162.6	1,306.1	1,415.1
Net income	207.5	856.0	906.4	1,018.6
Customer loans	56,198.0	55,218.0	56,850.0	61,240.0
Total assets	89,861.0	94,371.0	102,144.0	109,333.0
Equity	5,921.0	7,290.0	8,193.0	9,061.0
Net credit impairments	300.6	240.0	183.3	199.5
Other impairments and provisions	755.6	859.8	674.2	625.9
Impairments and provisions	1,056.2	1,099.8	857.5	825.4
Deposits and other customer resources	75,907.0	77,928.0	84,042.0	89,749.0
Total customer funds	92,808.0	95,328.0	102,938.0	111,782.0

Ratio (%)	2022A	2023A	2024A	2025A
ROE	4.0	15.3	13.8	14.1
Net interest margin	2.46	3.36	3.04	2.89
Cost-to-income ratio	37.4	30.8	36.5	37.1
NPE ratio	3.8	3.4	3.1	2.4
LCR	212.0	276.0	342.0	334.0
CET1 fully implemented ratio	12.5	15.4	16.3	15.9

Annual history combines different source vintages. It is not a fully restated single-vintage series. Total impairments is the sum of the two identified components; modification results are excluded.

02 / Half-year update

H1 2026 versus restated H1 2025. Six-month flows; balance sheets as at 30 June. These observations remain separate from annual series.

EUR million	H1 2025	H1 2026	YoY calc.
Net interest income	1,444.1	1,493.8	+3.4%
Fees and commissions	413.8	438.0	+5.8%
Operating income	1,848.0	1,950.3	+5.5%
Operating costs	683.5	720.2	+5.4%
Net credit impairments	89.8	104.4	+16.3%
Other impairments and provisions	280.6	188.5	-32.8%
Net income	502.3	565.8	+12.6%
Customer loans	58,839.0	63,836.0	+8.5%
Deposits and other customer resources	85,950.0	93,249.0	+8.5%
Total assets	105,466.0	114,800.0	+8.9%
Equity	8,404.0	9,562.0	+13.8%

Changes calculated from the displayed rounded amounts. For net income this gives 12.6%; the official reported change is 12.7%.

Ratio	H1 2025	H1 2026	Unit
ROE	14.3	14.6	%
Net interest margin	2.97	2.83	%
Cost-to-income ratio	37	36.9	%
Cost of risk	30	32	bps
NPE ratio	2.7	2.2	%
NPE coverage ratio	84.5	97.2	%
Loan-to-deposit ratio	68.5	68.5	%
LCR	336	326	%
NSFR	181	183	%
CET1 fully implemented ratio	16.2	15.1	%

Restatement: reverse repos were excluded from loans, with a EUR 96m impact in June 2025. Repos were excluded from deposits, with no impact on the June 2025 comparative. NPE and coverage retain the source glossary definitions.

03 / Scenario assumptions

2026E combines reported H1 2026 with an estimated second half. For 2026, growth rates below apply to H2 versus H1 flows or December versus June balances. In 2027 and 2028 they are annual rates.

Base

Driver	2026E	2027E	2028E	Unit
Net interest income growth	0	2	3	%
Other income growth	2	3	3	%
Operating costs growth	2	4	3	%
Cost of risk	40	40	45	bps
Net customer loans growth	3	4	4	%
Deposits/resources growth	2.5	4	4	%
CET1 assumption	15.1	15.2	15.3	%
Earnings retention	10	10	10	%

Optimistic

Driver	2026E	2027E	2028E	Unit
Net interest income growth	3	4	4	%
Other income growth	4	4	4	%
Operating costs growth	1	3	2.5	%
Cost of risk	30	30	35	bps
Net customer loans growth	4	5	5	%
Deposits/resources growth	3.5	5	5	%
CET1 assumption	15.3	15.5	15.7	%
Earnings retention	20	20	20	%

Conservative

Driver	2026E	2027E	2028E	Unit
Net interest income growth	-3	-2	0	%
Other income growth	0	1	1	%
Operating costs growth	4	5	4	%
Cost of risk	60	65	70	bps
Net customer loans growth	1	2	2	%
Deposits/resources growth	1	2	2	%
CET1 assumption	14.8	14.6	14.5	%
Earnings retention	0	0	0	%

Values represent author-selected sensitivities, with no assigned probabilities. CET1 is entered directly; retention does not model buybacks, OCI or regulatory capital requirements.

04 / Model outcomes and limits

Year	Scenario	Net income M€	ROE proxy %	C/I %	CET1 %
2026E	Conservative	1,049.9	10.98	38.10	14.8
2026E	Base	1,115.3	11.60	37.21	15.1
2026E	Optimistic	1,162.1	12.00	36.52	15.3
2027E	Conservative	922.8	9.65	40.53	14.6
2027E	Base	1,111.1	11.42	37.85	15.2
2027E	Optimistic	1,217.4	12.27	36.17	15.5
2028E	Conservative	875.2	9.15	42.05	14.5
2028E	Base	1,125.2	11.43	37.85	15.3
2028E	Optimistic	1,257.9	12.36	35.65	15.7

Calculation approach

Net interest income, other income and costs follow scenario drivers. Loans and deposits are projected from June 2026. Assets grow at the average of loan and deposit growth rates. H2 credit impairments equal projected net loans × cost of risk / 10,000 × 0.5.

The profit conversion factor is $565.8 / (1,950.3 - 720.2 - 104.4) = 50.2621\%$. It implicitly absorbs other impairments, modification results, taxes and non-controlling interests. Holding it fixed is a material simplification. For 2026, actual H1 flows are added to estimated H2 flows; balance-sheet stocks are not added.

Forecast ROE and ROA divide profit by closing equity and assets. These proxies differ from reported indicators, which use averages and issuer-specific adjustments. The transition from 2025A to 2026E must not be read as a directly comparable change in reported ROE.

Earnings retention affects only future estimated profit. There is no separate tax, risk-portfolio, RWA, dividend or buyback forecast. Assumptions are not statistically calibrated or backtested.

05 / Validation, sources and reproduction

Check	Result
Source register	182 unique historical cells: 124 annual + 58 interim
Evidence classification	176 source-verified reported cells; 6 recalculated totals
Active data completeness	No blank values or duplicate metric-period keys
Scenario validation	72 parameters; 162 forecast cells recomputed
Scenario comparison checks	126 values and variances reconciled
SQLite checks	10 tables; 36 SQL statements passed

Explicit status definitions

Source verified: value matched to the specified source and period. **Recalculated:** arithmetic total checked. **Model checked:** calculation reconciled. **Scenario assumption:** documented educational assumption. These labels do not claim independent audit assurance.

The 40 old Pending mapping rows were empty planning placeholders. The history is preserved in the archive and replaced by a unique register of observations actually used. The appendix contains every observation, beyond the rows visible in the dashboard.
